

Milwaukee Winter Warming Begins November 25th

Annually, the MCHH undertakes the critical responsibility of offering secure shelter to our community members facing homelessness, particularly during hazardous cold spells. Notably, there is no allocated funding within any budget to sustain this vital initiative. The indispensable assistance provided to those in need is made possible solely through the generous support of the community.

Last year our winter warming rooms served over 1100 unique individuals not just keeping them safe overnight but connecting many with housing and other support services.

With budgets squeezed across systems and communities, we urgently require community funding so that we can reach our goal of implementing our Winter Warming Plan for the full winter season.

Every contribution, no matter the size, brings warmth and hope to our neighbors in crisis.
